What is Gelato ICE?

Gelato ICE is the hub of the Linux-Itanium community.

Gelato Federation started holding regular meetings in 2002 to discuss advancing Linux® on the Intel® Itanium® architecture. With 10 meetings to date, Gelato continues to organize the only event focused on this ecosystem.

At Gelato ICE, attendees can:

- Network with key researchers, system vendors, industrial users, and ISVs
- Gain a better understanding of which tools to use and how to use them
- Learn how to maximize the performance of their systems
- Discuss ways to expand the impact of the platform
- Share knowledge and give feedback
- Collaborate on cutting-edge R&D

Gelato ICE attendance and technical program continue to expand.

The April 2007 Gelato ICE in San Jose, California, promises to deliver an exceptional speaker line-up with 70+ technical presentations. Attendance is expected to exceed 250 and include top Itanium processor scientists, developers, engineers, and end users from around the world.

The event will address current high-performance computing issues and collaborative solutions specific to Linux on the Itanium processor, and will feature presentations, formal papers, poster sessions, and the exchange of information in formal and informal settings.

The Gelato Federation has three ideals: **Collaboration. Education. Leadership.** We represent the interests of the Linux-Itanium community and provide the means to meet, learn, discuss, and initiate strategic Itanium processor-based projects that advance the platform.

Itanium® Conference & Expo | 2007 | San Jose | www.ice.gelato.org

Gelato ICE offers world-class content!

Presenters include international experts working on Linux on Itanium architecture, such as:

- Linux kernel and OS developers
- Linux-Itanium application software developers and users
- Itanium compiler engineers
- Current senior Itanium architects
- Members of the original Itanium design team
- Major Itanium processor book authors

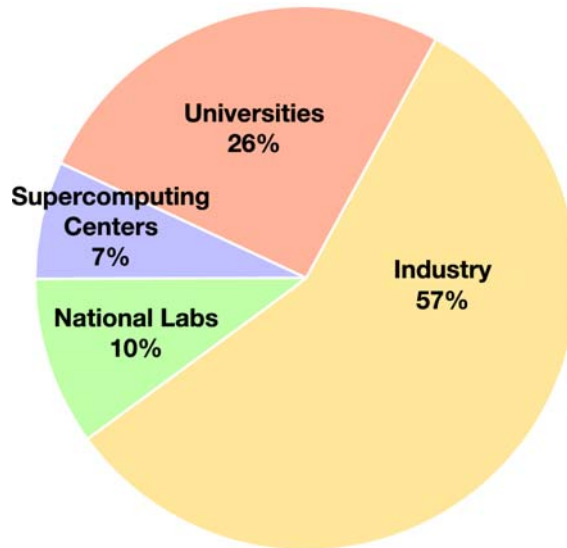

A wide variety of presentation tracks, such as:

- Multi-core programming
- IA-64 Linux kernel and scalability
- Topics for enterprise
- Software developer
- GCC
- Gelato member research
- Advanced topics
- Virtualization
- General interest

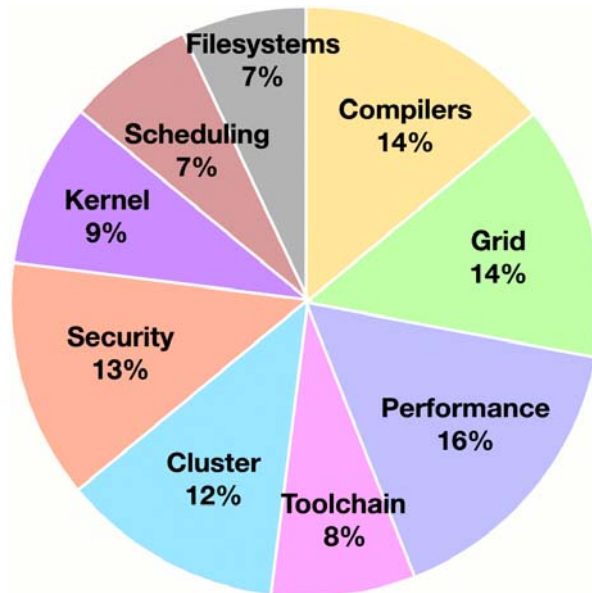

Who attends Gelato ICE?

Gelato ICE is *the* conference for technical users, application and tool developers, and system researchers looking to advance Linux on the Intel Itanium processor. Gelato ICE attendees are some of the world's top supercomputing centers, national labs, research centers, and universities, representing a variety of computing interests.

Previous Attendee Industry Breakdown

Previous Attendee Computing Interests

The Gelato community represents all corners of the globe!

North America: Canada, United States

Asia: China, Japan, Korea, Russia, Singapore, Taiwan

Europe: Bosnia and Herzegovina, Croatia, Denmark, France, Germany, Italy, Norway, Spain, Sweden, Switzerland, UK

Latin America: Argentina, Brazil, Chile, Mexico, Puerto Rico

Australia

Africa: Egypt
